

First-of-its-kind **parametric** earthquake insurance

Jumpstart

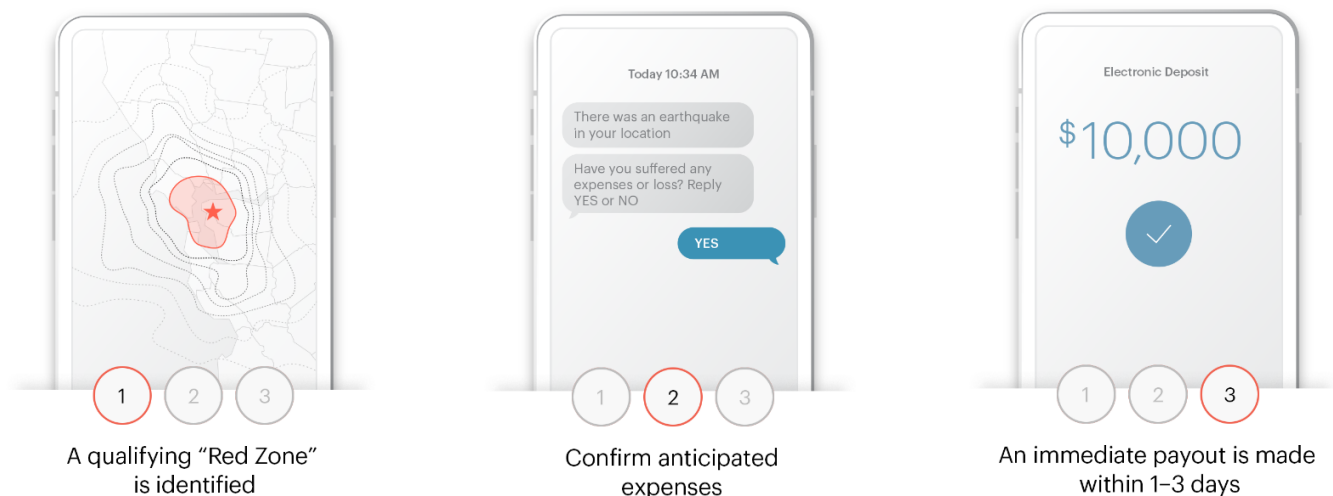

The USGS estimates a **99%** chance of a major earthquake within California in the next 30 years. In Washington and Oregon, the odds are nearly as high: 84% in the next 50 years.

If there's one thing the pandemic has taught us, it's to expect the unexpected. And the next big earthquake will be no exception.

Jumpstart pays a lump sum right away after a big quake, to use however you need to recover.

Simple. Transparent. **Affordable.**

- Payouts are triggered by transparent, public USGS data.
- Eligibility is determined by the shaking intensity at your insured location.
- No deductible. No adjusters. No paperwork.
- Funds can be used for any purpose.
- Average price of \$22 per month in CA, varies by ZIP code.
- Higher coverage amounts are available.

“ I chose Jumpstart because it offered me coverage that fit my needs and the process was easy and the price was right.
